

MPPC

SAMPLING LAID BARE

The Complete Guide To Sample Editing,
Sound Design & Program Construction on the

MPC RENAISSANCE & MPC STUDIO

7TH EDITION

BY ANDY AVGOSTI (MPC-TUTOR)

Table of Contents

Foreword	9
000 How to Use This Book	10
001 Getting Started	12
The MPC in a Nutshell	12
The Sampler	12
Pads & Programs	12
The Sequencer	13
Your First Project	13
Loading & Assigning Sounds	14
The File Browser	15
Navigating The File Browser	16
Setting Folder Shortcuts	16
Loading Sounds	20
Sampling Audio into the MPC	27
Record Sample Settings	29
Signal to Noise Ratio	31
Using Q Links to Change Parameters	32
Sampling Direct From Other Applications	35
Sampling Your Sound	36
002 Sample Edit Mode	39
Introduction to Sample Edit Mode	39
Sample Editing: Hardware vs Software	39
Edit Points	42
Adjusting the Start Point	46
Scrubbing Audio	49
Zooming In For Accuracy	51
Fixing the End Point	55
Discarding Unwanted Sample Data	60
The History Panel	62
Normalizing	62
Saving Sounds	63
003 Introduction to DRUM Programs	65
Understanding DRUM Programs & Banks	65

Assigning Sounds to Pads in the Software	68
Loading Sounds From Expansion Packs	72
Assigning Via the Hardware	74
The Pad Assign Screen	75
Rearranging Pads	76
Pad Keys	76
Naming & Saving Programs	77
Saving Entire Projects	80
Auto Save	82
Loading Programs	84
Project Notes	85

004 PROG EDIT Mode 87

Creating Your Own Program	87
Discovering Program Parameters	88
Sample Layers	90
Level	94
Changing Layer Pitch	94
Adjusting Layer Panning	95
Shaping Sounds with Amp Envelope	96
Filters	98

005 Program-Based Sound Design 101

What is Drum Layering?	101
A Simple Drum Layer	101
Making Adjustments to Each Layer	102
Adding More Layers	104
Manipulating Stereo Width	105
Layer Panning vs Pad Panning	106
Layer Offsetting	106
Limitations of Pad Layers	109
Layering With Simultaneous Play	109
'Painting' With Sample Elements	111
AD and ADHS Envelopes	111
Layering with Pad Start & Pad End	115
Applying Filters to Individual Layers	118
Using Panning to Avoid Phasing	119
Combining Layers & Simultaneous Play	119
Experimenting With LFOs	120
Tremolo Effect	120
Emulating Vinyl Crackle	122
Wacky Bass	123

Bit Crushed Drums	123
Effects in Sound Design	130
How to Create Dirty Drums	131
Vintage Effects	135
Dynamics & Transient Shapers	136
EQ For Corrective & Creative Applications	140
Using Send Effects As Inserts	142
Resampling Your Sounds	144
Reducing Hot Signals While Sampling	146

006 Sample Processing 147

Emulating Vintage Sampler Crunch	147
Increasing Grit While Sampling	150
Sampling With Effects	151
Using Sample Tune to Add Grit	153
Emulating Scratching Sounds	153
Time Stretching	155
Looping Samples	157
Understanding Loop Points	157
Looping Drum Breaks	158
Setting Loop Start Point	164
Creating Loops With the Looper	166
Using Loops in a Program	167
Extending the Length of Instrument Notes	169
Differences Between Drum Break & Instrument Looping	169
Setting the 'Looping Region'	171

007 Chopping Part 1 180

Chopping Using Extract	180
Using the Dedicated Chop Mode	181
Threshold Chopping	183
Controlling Preview Playback	186
Adding Slices From the Hardware	190
Cue Play Mode	192
Split/Combine	194
End Point Dilemma	194
Converting Slices 'Destructively'	195
Crop Samples or Not?	196
Fixing the End Clicks	199
Working With Events	201
Editing Note Events to Change Existing Drum Hits	204
Overdubbing Additional Drum Hits	205

Dealing with MONO Playback Issues	206
Applying a Quantize Template to Change Groove	208
Creating a Completely New Break	210
008 Chopping Part 2	214
Fine Editing Chop Points	214
The Shared Edit Point	217
The Speed Chopping Workflow	217
Unlinking Slices	218
Applying Processes to Slices	221
Patched Phrase	222
Tuning a Patched Phrase	224
Changing Musical Pitch of Notes in a Bass Loop	224
009 Building Advanced Drum Kits	227
Timbre Variation Using Multisampled Drums	227
Velocity Switching Pad Layers	228
Loading Using Shift & Drag	229
Performing Velocity Switches	233
Layer Switching	235
Muting the Open Hat	236
Mute Groups	237
Mute Targets	237
Program Mixer	238
Emulating Timbre Changes	243
Utilising Amp Envelope	245
Adding Random Play Emulations	246
Creating a Dedicated Soft Kick	246
Velocity Sensitive Timbre Emulations	246
Utilizing the LFO	248
Time Stretching The Open Hats	249
Dealing with Pad Sensitivity	250
Program Specific Pad Sensitivity	252
A Practical Kit Set Up	253
Setting Custom Pad Colours	253
010 Musical DRUM Programs & 16 Levels	260
Using DRUM Programs to Emulate Real Instruments	260
Amp Envelope & Sample Play Settings	260
Tuning a Sample Across the Pads	262
Monophonic Playback For Bass Programs	264

Using 16 Levels For Instrument Performances	265
Understanding the Sequence Modifier Lane	268

011 Multisampling & Keygroup Programs 270

What is a Multisampled Instrument Program?	270
Creating Keygroup Programs	271
Musical Notes & Keygroup Pads	274
Creating a Piano Keygroup Program	276
Sourcing Multisamples	277
Setting Up Your First Keygroup	280
Adding Keygroups	283
MIDI Keyboard & MIDI Keys	286
Applying ADSR	287
Timbre Emulation Within a Keygroup	289
Utilising The Root Note	290
Tuning & Transposing Keygroup Programs	292
Using Filters & Effects	292
The Filter Envelope	297
Applying LFO	299
Pad Perform Mode	300
Playing Chords	302
Chord Progressions	303

012 Non Destructive Chopping Techniques 306

Introduction to Non-Destructive Chopping	306
Assign Slice to Pad	307
PROGRAM Chop Mode	311
NDC Over Multiple Layers	316
Chopping Musical Pieces	318
Lazy Chopping	321
Chopping By BPM	322
Chopping Using Pad Parameters	324
Experimenting With Your Initial Chops	326
Tightening Your Chops	328
Converting Non Destructive Chops	331

013 Final Words	331
Appendix A: Setting Up Your MPC	333
Appendix B: Sequencing 101	345
Appendix C: MPC Resources	360
