# MPC Synth Bundle (Demo): Introduction

- This is the demo edition of MPC Synth Bundle, a curated collection of 26 instruments taken from the full three-expansion collection, with sounds multisampled from a range of analog & digital synths.
- That's a huge range of powerful and expressive synth bass, leads, pads, strings and keys inside your MPC, suitable for all modern electronic music styles including trap, hip hop, lofi and EDM.
- All programs are memory-optimised and are fully compatible with all modern MPCs, MPC Software, MPC Beats and the Akai Force.
- You can purchase the full version from <https://www.mpc-samples.com/product.php/305/mpc-synth-bundle/>

# Install: Standalone MPC & Akai Force

After downloading the expansion, extract the zip file contents to your computer. Enter the '**Standalone MPC-Akai Force**' folder and inside you'll see a sub folder '**MPC Synth Bundle Demo**' – this is the folder we're going to transfer to your MPC/Force.

Expansions must be installed to either an **SD card**, a **USB drive** or, if you have one, an internal **SATA disk**.

The first step is to mount this 'MPC disk' on your computer. If you use an SD card or USB disk, you can just eject the disk from your MPC/Force and physically insert it into your computer's SD card reader or USB port.

Alternatively, connect your MPC or Force via USB to your computer and go to **MENU** and hit the '**MPC chip**' icon at the top of the screen (this is the '**Laptop**' icon in the Force).

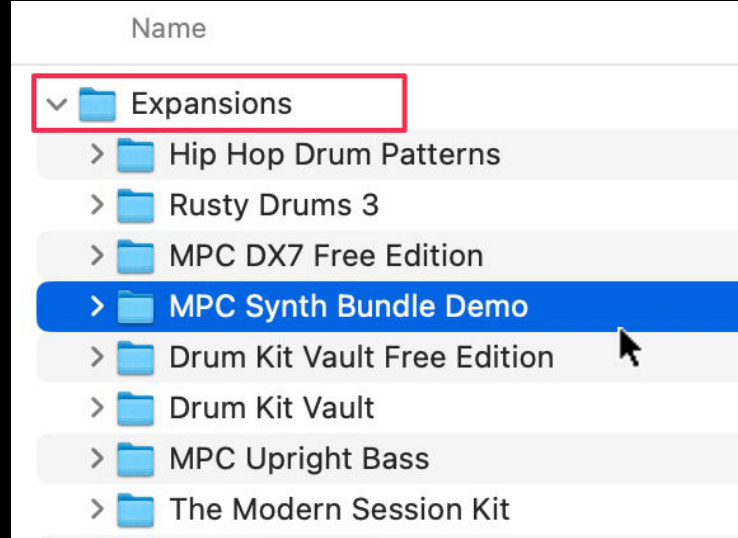

Now select **CONTROLLER MODE** ('**COMPUTER MODE**' in the Force).

Whichever connection method you choose, your MPC disk should now appear as a removable drive in your computer's file manager (e.g. Finder or File Explorer). Click on the drive to open its file system:

If it doesn't already exist, create a folder called '**Expansions**' in the root of your disk. Now copy the '**MPC Synth Bundle Demo**' expansion folder *inside* this 'Expansions' folder.

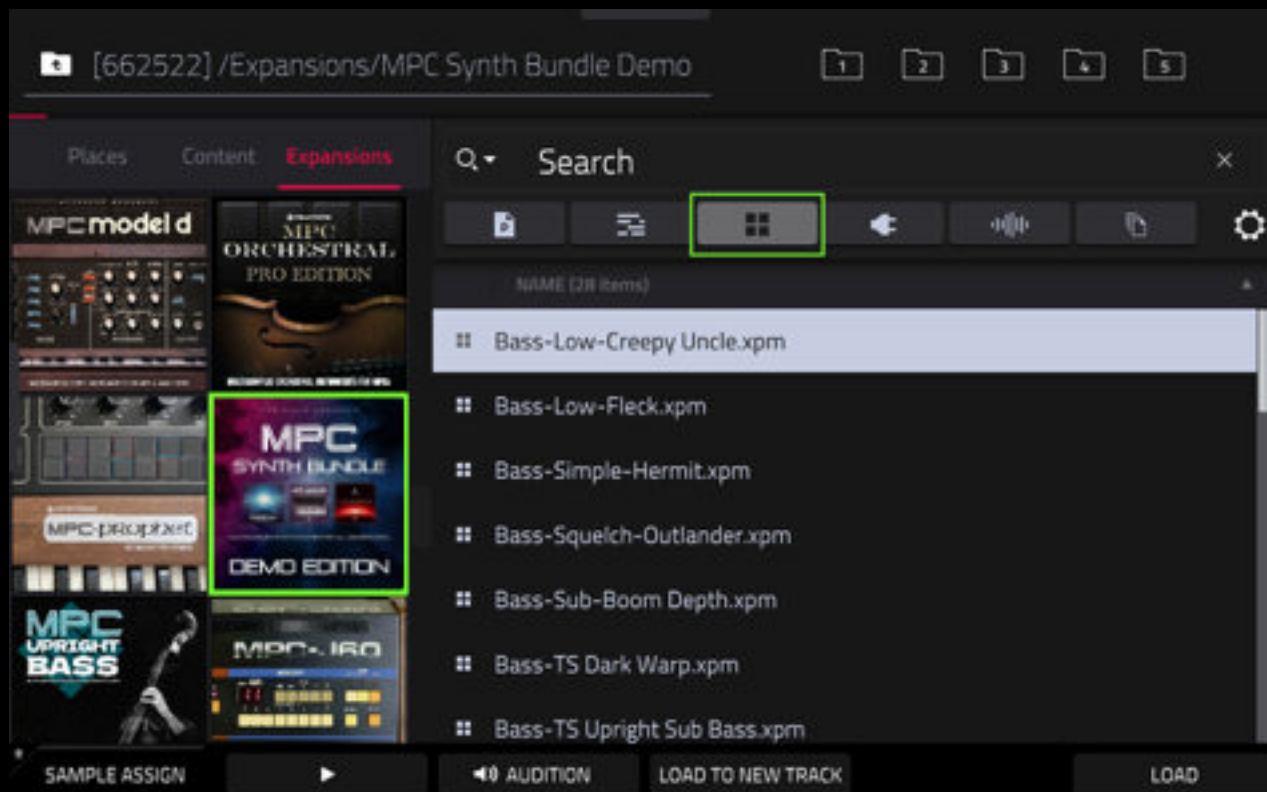

All done! If you had physically transferred the MPC disk to your computer you should now eject the disk from your computer and put the disk back in your MPC.

Alternatively, if you used USB transfer then go back to **MENU** and select the computer icon to return to standalone mode - *don't forget to eject/unmount the MPC from your computer first, this avoids any potential data loss.*

# Loading Instruments (Standalone MPC/Force)

In your MPC, go to 'MENU > BROWSER > Expansions' and tap on the 'MPC Synth Bundle Demo' thumbnail. Select the PROGRAM filter:

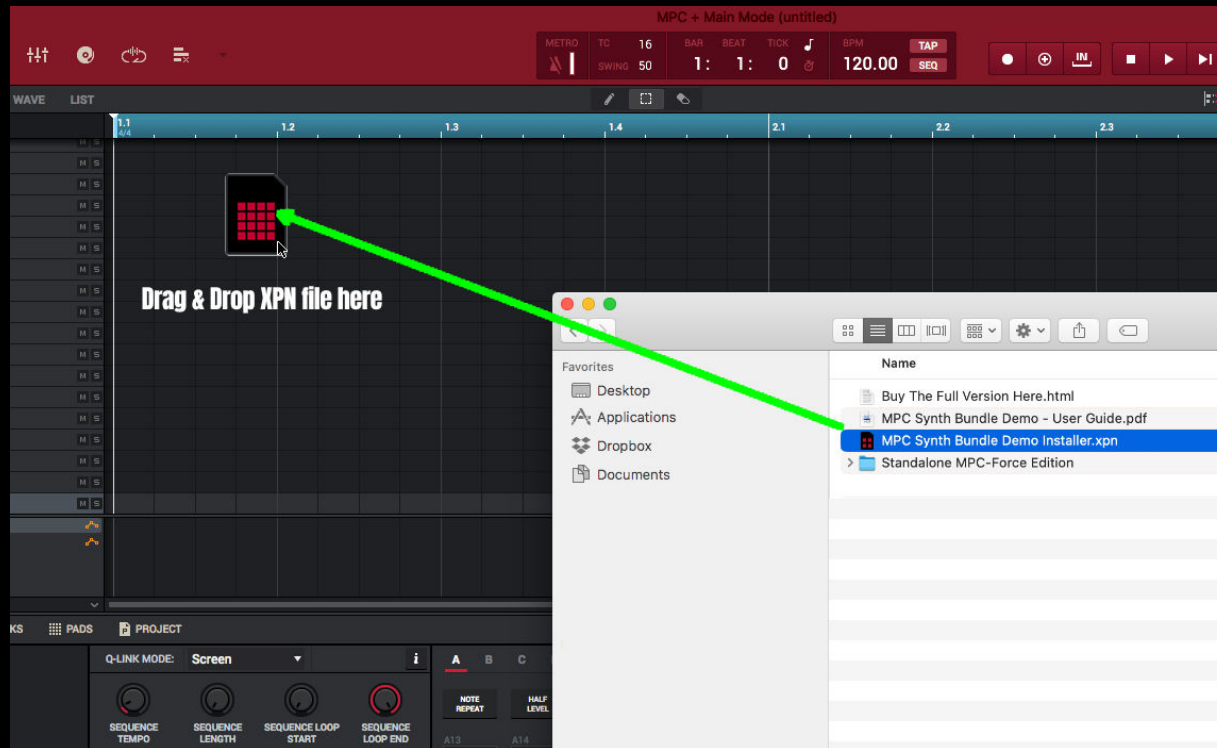

If you have '**AUDITION > AUTO**' enabled (bottom right of BROWSER screen) you can tap any program file to hear a preview of each kit.

To load the instrument to the current KEYGROUP track, either double tap the XPM file or single tap and press **LOAD**.

# Install: MPC Software Expansion Browser

Locate the 'MPC Synth Bundle Demo Installer.XPN' file and drag & drop it directly into the MPC Software UI from your computer's File Explorer/Finder:

*Please note that an XPN file **cannot** be installed from the MPC Browser, nor can it be installed by double clicking.*

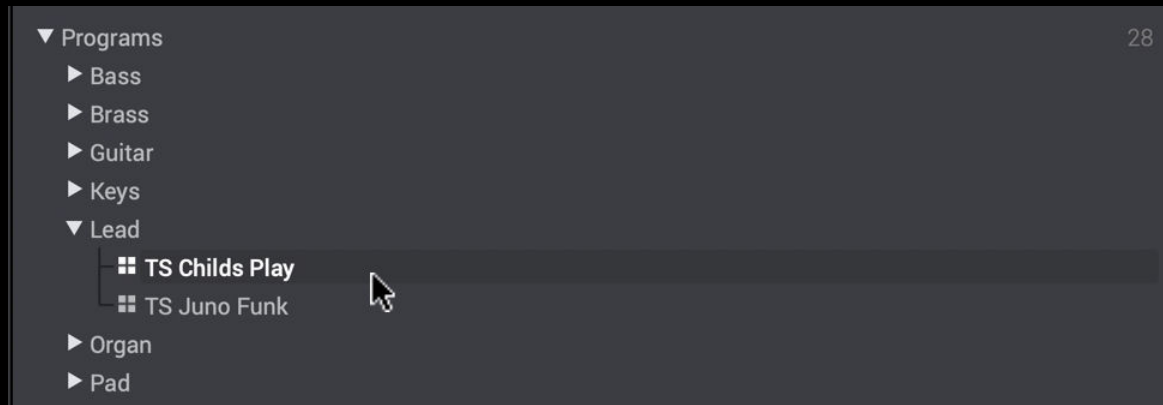

After dragging the XPN into the software UI you will see the following:

Select **'Import'** and once installed, open the **Expansion Browser** ('X' on your keyboard) and click on the **'MPC Synth Bundle Demo'** thumbnail to view:

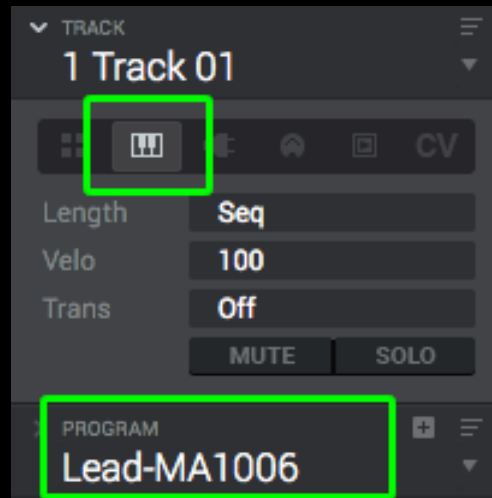

Expand the **'Programs'** group to reveal all the instruments, all organised into sub-categories based on the instrument type:

Single click to hear the program preview - this requires **'Autoplay'** enabled:

Double click a program to load it to the current **'keygroup'** type track. Alternatively, drag the program directly into your project. The Inspector will show that the program is loaded:

# Further Resources

If you need help learning how to use your MPC, check out MPC-Tutor's range of **MPC tutorial** books and courses at:

<https://www.mpc-samples.com/section.php/8/0/mpc-tutorials-courses/>

**MPC Analog** is part of our growing range of MPC and Force expansions – check out our entire range here, with loads of acoustic keys, pianos, drum kits, bass, synths & much, much more:

<https://www.mpc-samples.com/section.php/78/0/mpc-expansions/>

You can purchase the full version of the **MPC Synth Bundle** here:
