USING THE MPC WITH
ABLETON LIVE

Written By Andy Avgousti (MPC-Tutor)
# Table of Contents

001  **Initial Hardware & Software Set Up**  
- Basic Requirements  
- MIDI & Audio Basics  
- Choosing Your Audio Interface  
- Audio Hardware & Software Set Up  
- MPC Audio Connections  
- Live Channel Configuration  
- MIDI Hardware Configuration  
- Live MIDI Set Up  

002  **Using Ableton Live As A Sound Module**  
- Overview  
- Live Software Setup  
- Creating Your Instrument Tracks  
- Setting the Audio Outputs  
- Setting the Receiving MIDI Channels  
- MPC Sequence Settings  
- Recording your MIDI Performances  
- Dealing with the Mix  
- Setting a project tempo  

003  **MPC MIDI Control of Live**  
- Working with Clips  
- Using MPC pads to Launch Clips  
- MPC Set up  
- MIDI Mapping in Live  
- Clip Playback Options  
- Launch Modes & Quantization  
- Utilizing Follow Actions, Chances & Scenes  
- Controlling Live With Q Links (JJOS 2/XL & MPC4000)  

004  **Syncing Your MPC With Live**  
- MIDI Sync Overview  
- Syncing with MIDI Clock (MPC as Slave)  
- Syncing with MIDI Clock (MPC as Master)  
- Adjusting MIDI Sync Delay  

Syncing with MTC (MPC as Master) 74

005 Transferring MPC Audio Performances into Live 79

Why Do We Track? 79
Recording audio – initial steps 81
Audio tracking – ‘manual’ method 86
Audio tracking using MIDI Clock 91
Audio tracking using MTC 93
Recording Individual drum tracks 96
Multi track audio recording 98
Grouping Tracks 100
Importing Audio Into Live 101
Resampling your MPC outputs 102
MPC Audio Tracks (JJ OS) 105
MPC5000 hard disk recording export 106
Importing Audio as Live Clips 107

006 Transferring MPC MIDI Sequences into Live 110

Importing MIDI into Live as MIDI Clips 110
Exporting MIDI From Your MPC 110
Creating your MIDI Clip 116
Recording MPC MIDI in ‘Real Time’ 117

007 Final Word 120
